Git, AWS, Docker

PROFILE

Dedicated Full-Stack Developer with a focus on the MERN stack (MongoDB, Express.js, React, Node.js). With hands-on experience in both front-end and back-end technologies, I am adept at creating dynamic and responsive user interfaces, as well as designing robust server-side logic. Proficient in Typescript, and frameworks like Next.js and Nest.js, I am committed to delivering high-quality code and innovative solutions. Currently pursuing a Bachelor of Science in Computer Science at the University of the People, I continuously strive to expand my skill set and stay updated with the latest industry trends.

WORK EXPERIENCE

Full-Stack Web Developer

MyanCare Telemedicine 2022-Present

- Migrated Twilio VoIP features into Zoom integration for video teleconsultations.
- Developed and maintained a comprehensive doctors income reporting feature and wallet deduction feature enabling automated and manual deductions from user wallets.
- Developed tele web application with consulting capabilities for an appointment booking system.
- Participated in the development and implementation of the Sun Community Health (SCH) medical EMR records application as a side project.
- Developed baby tracker and baby development milestone feature in YinThway application as a side project.
- Integrated user authorization feature into the system to enhance security and differentiate user access levels.
- Maintained complex user authentications on Firebase.
- Deployed applications on AWS and Firebase, ensuring scalability and reliability.

Intern Full-Stack Web Developer

MyanCare Telemedicine 2022-2023 (4 months)

- Developed a full-stack social media application as practice project.
- Collaborated with co-worker to develop a medicine delivery platform as a practice project.
- Conducted manual testing on various applications, employing hands-on approaches to assess functionality, user experience, and performance.
